

Issues Affecting Our Communities: Human Trafficking and the Opioid Epidemic

If you live or serve in New Berlin and surrounding communities, you have probably heard about issues we face with human trafficking. Did you know that Wisconsin ranks third in the nation for human trafficking? No community is immune. The opioid epidemic, which affects all ages, is another concerning problem.

Please join us for presentations on these significant community issues. Knowledgeable experts will explain human trafficking and the opioid epidemic, how these problems affect us all and what is being done to combat them.

This presentation is a collaborative effort of the Froedtert & the Medical College of Wisconsin Moorland Reserve Emergency Department, the New Berlin Police Department and the School District of New Berlin. *The presentation is for adults ages 18 and older. Children ages 12-17 may also attend with an adult.*
