

City of New Berlin

Preferred Tree Species List

This list is to serve as a guide for the installation of trees in within development areas in the City of New Berlin. The purpose is to promote species diversity based upon our existing tree resources and encourage a thriving urban forest canopy. The major consideration when choosing trees for development is to have no more than 10% of the planting be of any one species. This is not all-inclusive list and substitutions may be made with approval.
