

REGISTRATION INFO

Due to increasing concerns about concussions in youth sports, we ask that you please review the following information, in accordance with Wisconsin Act 172, statute 118.293. Our participants' safety is our number one concern!

WHAT IS A CONCUSSION?

A concussion is a type of traumatic brain injury that changes the way the brain normally works. A concussion is caused by a bump, blow or jolt to the head or body that causes the head and brain to move rapidly back and forth. Even a "ding", "getting your bell rung" or what seems to be a mild bump or blow to the head can be serious.

WHAT ARE THE SIGNS & SYMPTOMS OF A CONCUSSION?

Signs and symptoms of a concussion can show up right after the injury or may appear days or weeks after the injury. If an athlete reports one or more symptoms of concussions listed below after a bump, blow, or jolt to the head or body, they should be kept out of play the day of the injury and until a health care professional, experienced in evaluating concussions, says they are symptom free and OK to return to play.

SIGNS REPORTED BY COACHING STAFF:

- Appear dazed or stunned
- Forgetfulness/confusion
- Moves clumsily
- Answers questions slowly
- Loses consciousness
- Shows mood or behavior changes

SYMPTOMS REPORTED BY ATHLETES:

- Headaches or pressure in the head
- Nausea or vomiting
- Balance problems or dizziness
- Blurry vision
- Sensitivity to noise
- Memory problems
- Confusion
- Feeling sluggish, hazy, or groggy

CONCUSSION DANGER SIGNS:

In rare cases, a blood clot may form on the brain of a person with a concussion. An athlete should receive immediate medical attention if after a bump, blow, or jolt to the head or body they exhibit any of the following danger signs:

- One pupil is larger than the other
- Cannot be awakened
- A headache that gets worse
- Slurred speech
- Seizures
- Repeated vomiting
- Loses consciousness for any amount of time

WHY SYMPTOMS SHOULD BE REPORTED?

If an athlete has a concussion, they need time to heal. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in youth athletes can result in brain swelling or permanent damage that has the potential to be fatal.

WHAT SHOULD YOU DO IF YOU THINK AN ATHLETE HAS A CONCUSSION?

If you suspect that an athlete has a concussion, remove them from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play until a medical professional says they are symptom free and OK to return to play. Rest is the key to help an athlete recover. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.
